

ENTREPRENEUR'S PROGRAMME

7 & 8 FEBRUARY 2018

The OpTIC Technology Centre, North Wales

APPLY NOW

We are rolling out our acclaimed Entrepreneur's Programme across the UK.

This high-impact, fast-track programme is specially designed for entrepreneurs with an idea for a new technology product or service or founders of existing high-tech companies needing a boost to the next level.

It covers all the essential elements of starting a business such as getting to problem/solution fit, identifying the market opportunity and building a financial plan. It's the perfect environment to 'stress test' your business.

This programme is specifically targeted at entrepreneurs developing a technology that incorporates:

- **space data**
- **downstream space applications**
- **5G**
- **GPS**
- **radar**
- **earth observation & tracking**
- **satellite operations**
- **launch technologies**

"I have never experienced an event like this before or rubbed shoulders with so many successful people. I have learnt more in these two days than I have since I started my company."

Previous participant, James Mannion

"As clichéd as it sounds, SETsquared's Entrepreneurship Programme was life changing. It was an incredibly valuable experience and I wish I'd had the opportunity to take part in a programme like this when I originally went into business 10 years ago."

Previous participant, James Hill
